

Statement from Test Assessment

We have on three different occasions tested Pilase V Limited's product **Oil Sponge** at Arlanda Airport outside Stockholm.

Ragn-Sells AB is an entrepreneur acting on behalf of the Swedish Board of Civil Aviation at Arlanda. Our assignment is to collect and classify all wastes including special/controlled waste such as jet fuel, oils and solvents.

We have tested **Oil Sponge** together with the Swedish Board of Civil Aviation and cleaned waste oil, hydraulic oil and jet fuel.

All tests went very well and the results are significantly better compared to other absorbents.

Our objective is to include the restproduct of Oil Sponge in compost and avoid expensive disposal costs. These projects have already started and we are expecting the final test results during spring year 2000.

Arlanda 28 September 1999
